

Lab 9 out of lab
Robert Tognoni

Part 1)

```
[rtognoni1@gsuad.gsu.edu@snowball Lab9]$ cat belongus.txt
wwwwwwaaaaaaaaaaaaaaaaaaaaabbbbbbb
[rtognoni1@gsuad.gsu.edu@snowball Lab9]$ ./getMostFreqChar.out belongus.txt
The most frequent letter is 'a'. It appeared 24 times.
[rtognoni1@gsuad.gsu.edu@snowball Lab9]$
```

fundamentally how arrays work. Each element is simply the next address from the previous.

3) `printf("sizeof(numbers) = %lu\n", sizeof(numbers) / sizeof(int));`
`sizeof(array)` gives the total byte size of the array. To get its length divide by the size of its data type which is `int` in this case.
